SUMMARY

To explore IT roles in areas focused on Management of teams in Data Analytics & AI.
My experience is focused in areas working with data hands on and as a leader. Currently I manage 2 teams: Analytics Engineering with 13 direct reports and AI Engineering with 3 direct reports.
I have grown alongside small organizations and large multi-domain/multi-national corporations. I have spent most of my younger working years building my skills and experience, my hope is to take my talents and find a career with an organization for the long-term.

PROFESSIONAL EXPERIENCE

Project Lead - Analytics & AI Engineering
Holman Enterprises, New Jersey - Remote | 2022 - Present

I manage enterprise analytics and AI engineering teams to support organizational initiatives and large-scale digital transformation across multiple business domains

- Built and lead Analytics and AI Engineering teams from the ground up, establishing standards, development frameworks, and delivery practices.
- Architected self-service data strategy using DBT, Databricks, and Power BI
- Designed and implemented multi-agent architectures leveraging Microsoft AI Foundry, Copilot Studio, and Databricks
- Partner with executive stakeholders to align analytics and AI strategy with business transformation objectives

Freelance – Analytics & Cloud Consulting
Self-Employed, New Jersey – Hybrid | 2019 – 2022

I provided consulting services to small and mid-sized organizations supporting cloud adoption and building business apps/analytics solutions.

- Designed and deployed Azure-based data platforms and applications in cloud
- Planned and built analytics models using SQL Server, Power BI, and ADF
- End-to-end digital strategy and implementation consulting

Northwood Insurance Corp
Operations Analyst, New York - Remote | 2015 – 2018

I supported operations by modeling, analyzing, and reporting on data relevant to the insurance industry

- Performed operational and financial modeling and reporting across various business unit
- Developed reporting frameworks using Excel, Power BI, and SQL to support strategic decisions, risk evaluation, and fraud detection
- Worked with leadership to translate analytics findings into operational improvement

Psychological Operations Specialist (37F)
US Army | 2009 – 2015

I conducted information and behavioral analysis operations supporting military objectives.

- Applied data analysis, behavioral research, and strategic communication techniques.
- Led and collaborated within high-pressure operational environments requiring rapid decision-making.
